marital_status

+ height
+ weight

Practitioner

- approved
+ experience
+ specialization
+ is Senior

separate specialization
table unnecessary

Practitioner

Remove regulation

table. If a

person is senior

practitioner they can

both diagnose and

review diagnoses.

Acc. to Sir Talha.

Patient symptoms

+ Intensity

+ Is in family

+ Odd symptom

Odd symptom entry
in case the symptoms
patient enters are
not already in the
disease database.

meetings
+ time

Diagnosis Ratings

- correctness ?

Kating system
similar to the
one in google
play store

Need to add
prescription table
as well (connect with
patient & diseases)

↳ Prescription

Presc.ID

Presc name

diet
Amount
Method

Also, a table
about questions

Questions

is

statement?...

Have to go
over this with
Sir Talha. Also

need some
format to store
the answers.

Electronic Health Record

- content

+ Diagnosis ID

+

some way connected
with questions and
answers that are
general.
